PORTABLE TRACTOR SHEDS

**A GREAT RANGE OF
TRACTOR IMPLEMENTS.**

GOLDONI & FERRARI QUAD TRACTORS

Products are sourced only from the UK and Italy

www.bsgtractorsandmachinery.co.uk

BSG Tractors and Machinery was established in 1986.

We offer a service to those people who own or manage land . We supply a wide range of equipment, comprehensive technical support, parts back up and an exchange or buy back option when our products are eventually no longer needed.

This allows us to offer used or refurbished machines.

It also ensures that condition and value in our equipment is maintained.

This catalogue contains the main items that we sell, but as the situation is constantly changing, please see our website or contact us for more information on any requirements that you may have.

PORTABLE BUIDINGS Portable Tractor Shed & Portable Shelter

The Portable Tractor Shed, designed to house a small tractor and implements, or for livestock, animal feed, logs etc. Being moveable it does not come under the normal planning constraints and so can be placed in the best location. Construction comprises of a strong box profile steel frame, covered with juniper green, polyester coated, steel profile sheeting. It is mounted directly on steel runners with towing eyes. The tractor shed blends into the scenery and can be moved easily with a tractor. A single wide hinged door gives a two metre wide opening for easy access .

Standard Shed Sizes:- overall size L 3m x W 2.3m x H2.3m. A higher version is available for extra headroom. Lengths can also be 4m or 6m by joining 2 x 3m.

QUAD TRACTORS

Goldoni

What is a Quad Tractor? The design gives four equal sized wheels, with around 65% of the total weight on the front axle, by adding the weight of the driver and rear implement the tractor becomes more stable in use. A conventional tractor is taller, and so less stable, with the majority of the weight on the rear axle. Often front weights need to be added to maintain stability.

QUAD TRACTORS, can offer the following features:- **A LOW CENTRE OF GRAVITY** for **EXTRA SAFETY ON HILLS**. With articulated (**4 WHEEL STEERING**) it is possible to make **TIGHTER TURNS**. **GROUND DAMAGE IS REDUCED ON SOFT GROUND**, as the front wheels always remain parallel. **CONSTANT 4 WHEEL DRIVE** will give **EXTRA TRACTION** at all times and also the benefit of constant **4 WHEEL BRAKING**

GOLDONI QUAD TRACTOR 20 (This model is currently not in production). We are able to offer some used and refurbished Quad 20 Tractors.

This model was introduced and developed by us 25 years ago and has proved to be very popular.

Dimensions, Length 2.5m Width 0.9 to 1.2m, Wt. 750kg, Engine 20hp air cooled, 6 F + 3Rev gears . Wheels 6,50x15" , or (wide wheels 26"x 12"), Prices from £8,990. Options, larger footplates £285, tipping pipe £110, side mounted hydraulic lever £140.

ALL PRICES EXCLUDE VAT
