www.bsgtractorsandmachinery.co.uk

The portable tractor shelter/shed is designed to house a small tractor and several implements. Other things can also be stored such as animal feed, logs or even livestock. It is cheaper than a container, can easily be unloaded and moved without a crane and does not suffer from condensation.

The shelter or shed is constructed with a strong box profile, steel frame, covered with juniper green, country clad polyester coated steel sheeting. It is mounted on skids with four steel towing eyes, anchor pins/bolts are included. The shelter/shed is supplied fully assembled, it can be delivered and just slid into position from a trailer.

The standard **Shelter** has three sides, it can be open at one side or end. The **Shed** has a single 2m wide door to give a wide opening for easy access and secured with a padlock. **As a portable structure, it does not come under normal planning constraints and can be located to suit wind or sun** and moved should the need arise.

The standard size is, internal height is approximately 1.8m on the lower side, 2.1m on the higher side, width 2.3m and 3m or 4 long. Multiple units can be joined and 30cm extra roof height and the installation of roof lights is possible. Wider units 2.5m wide with double doors are available in 2m long sections ((bottom right).

A 3m wide shed in two halves 4.6 to 6m long.

PRICES:- start from £1,780 , but owing to the shortage of steel quotations are on a daily basis.

Prices exclude vat and delivery.

**Multiple Units Can Be Joined
To cover larger areas.**
